Installing *CONNECTOR BOARD and PAUSE MEMORY for A700*
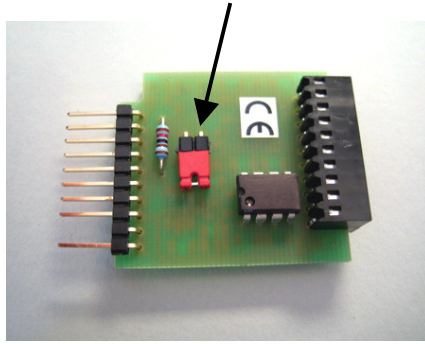

Before installing you have the possibility to choose between two different modes for Pause Memory A700:

Jumper = small red bridge connector on the board

1. **Standardfunction**

    Jumper on **BOTH** pins

    (as delivered):

- ➢   recording starts immediately
- ➢   just pause memory is working.
- ➢   Pressing any button initiates the desired reel movement

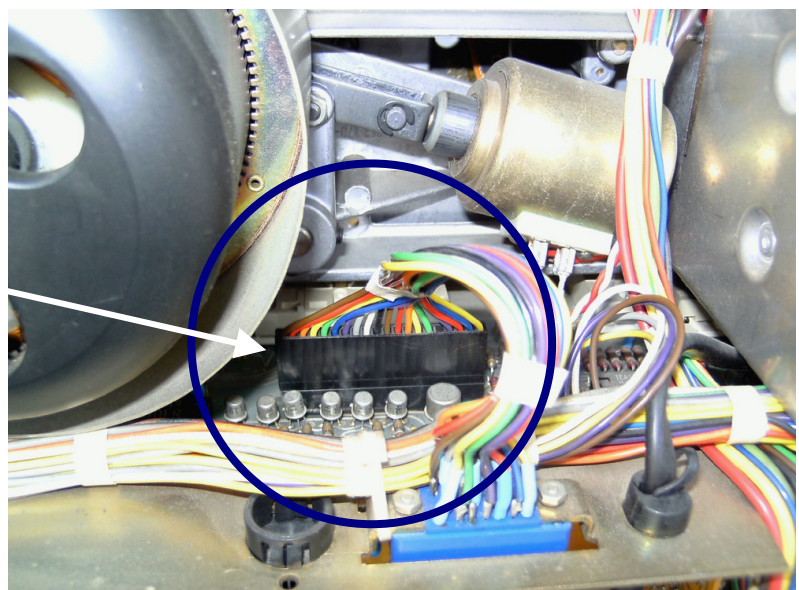

2. **special function**

    Jumper **just** to **ONE**
    of the pins:

- ➢   Connecting the jumper to one pin, you can switch from PAUSE to PLAY or REC, preventing the A700 from starting to run.
- ➢   Recording starts without a clicking sound.
- ➢   Reel funktion PLAY or REC is started then by pressing PAUSE button again.

**Unscrew the 8 phillips screws on the backside of the A700 case. Tilt the lid a little when taking it off.**
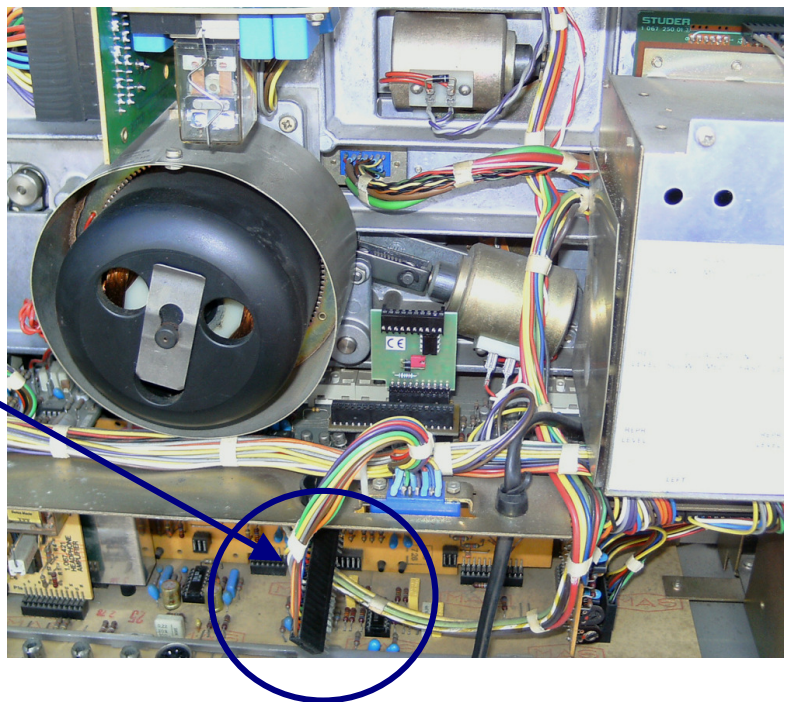

This connector is to be pulled out

Office for electronical devopment and consulting ▪ Ernst Schmid Munich

Carefully plug in the A700 connector board instead with plugged-in Pause Memory

Take the loosely hanging connector and carefully plug it in the A700 adapter board

installing complete – enjoy your new Pause Memory !
