# Installing *Revox B77 PAUSE MEMORY*

Before installing you have the possibility to choose between two different modes for Pause Memory B77:

Jumper = small red bridge connector on the board

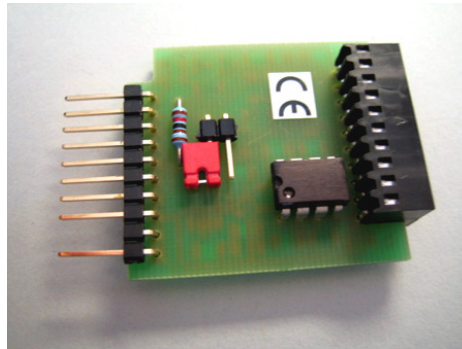

1. **Standardfunction**
   Jumper on **BOTH** pins
   (as delivered):

   ➢ recording starts immediately
   ➢ just Pause Memory is working.
   ➢ Pressing any button initiates the desired reel movement

---

2. **special function**
   Jumper **just** to **ONE**
   of the pins:

   ➢ Connecting the jumper to one pin, you can switch from PAUSE to PLAY or REC, preventing the B77 to start running.
   ➢ Recording starts without a clicking sound.
   ➢ Reel funktion PLAY or REC is started then by pressing PAUSE button again.
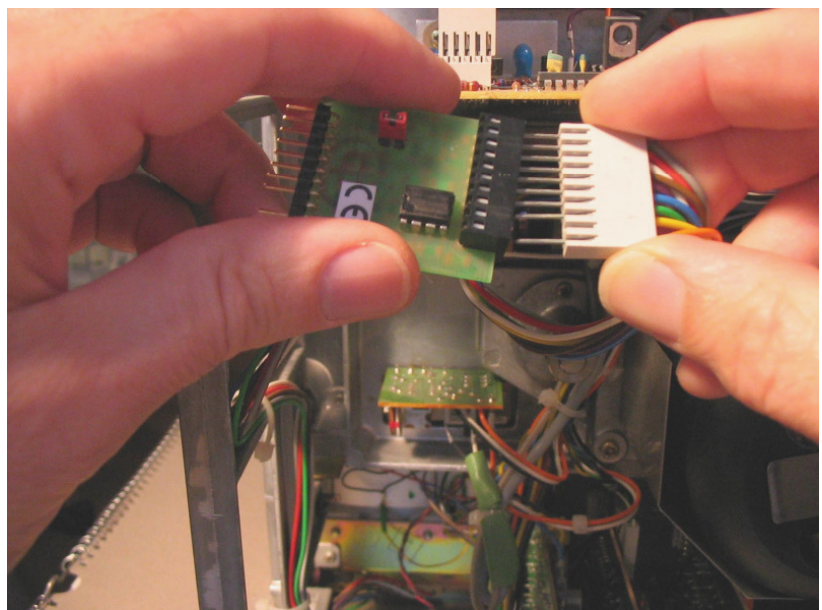

---

unscrew

Unscrew the four phillips screws on the backside of the B77 case:

This connector is to be pulled out

Pull connector downward
stabilize the board with your
other hand
